The right rose for me - I plant it and it works

PharmaRosa Ltd.'s mission is to make the world's most beautiful and most distinctive garden roses available across Europe - for you. The aim of our programme is to preserve the value of old, rare roses, support the creation of new varieties, and offer the finest, most resilient roses to all who would like to grow beautiful, healthy, long-lived roses in their own garden.

What does this mean for you, as a rose lover or garden enthusiast?

Access to rare and special roses

Our range includes many historical and collector roses whose preservation has been supported by passionate rose collectors and rosarium owners. We offer these varieties to you as a legacy, bearing their names.

A continuously expanding range of modern roses

You will also find the latest rose varieties from our breeding partners, presented to you with outstanding ornamental value, strong resistance, and sustainable cultivation - directly from the grower.

Results of sustainable, environmentally conscious rose cultivation

All our roses are own-root plants, propagated vegetatively, produced with lower resource use, without chemicals, and in an environmentally responsible way. You receive the product of a sustainable horticultural model.

Reliable quality, directly from the producer

We do not only offer roses for sale; we also ensure that they truly represent the quality we promise: healthy, long-lived, and exactly as you see them in the photos.

A community for roses

Participants in our programme - collectors, breeders, nurseries, and resellers - work together so that you can take home the most beautiful and most valuable roses. When you buy from us, you receive not only a plant, but a story, a tradition, and commitment.

Our love of roses connects us. Discover our selection, become part of this special horticultural community, and transform your garden into a living sanctuary of roses!

Frühlingsduft

cream-yellow - wild rose
176-275 cm
very strong, room-filling scented rose - classic, rosy character
Wilhelm J. H. Kordes II.

Frühlingsgold®

yellow - wild rose
180-280 cm
medium-strength, clearly scented rose - clean, musky
Wilhelm J. H. Kordes II.

Glauca Carmenetta

mauve-pink - park rose
240-360 cm
mild, restrained-scented rose - soft, elegant character
Isabella Preston

Rambling Rector

white - historic - rambler, climbing - trailing rose
400-800 cm
strongly scented, easily noticeable rose - rich, spicy-musk aroma
-

Rosa banksiae alba

white - species rose
400-800 cm
mild, restrained-scented rose - delicately floral character
William Kerr

Rosa Banksiae lutea

yellow - species rose
420-780 cm
very weak, barely noticeable scented rose - classic rose character
John Damper Parks

Rosa canina Abbotswood

pink - landscape shrub rose
200-250 cm
medium-strength, pleasantly scented rose - soft, sweet, classic wild-rose aroma
Fred Tustin

Rosa cannabifolia

pink - landscape shrub rose
100-150 cm
medium-strength, well-scented rose - delicate, sweet, classic rose scent
Flobert

Rosa foetida

yellow - wild rose
160-240 cm
medium-strength, noticeably scented rose - distinctly spicy aroma
-

Rosa foetida bicolor

orange - landscape shrub rose
150-250 cm
strong, clearly scented rose - rich, sweet-spicy, slightly liquorice-anise

Rosa kokanica Vacratot

white - landscape shrub rose
150-200 cm
strong, long-lasting scented rose - scent description not available

Rosa moyesii 'Eos'

pink - wild rose
200-300 cm
very weak, barely noticeable scented rose - scent description not available
Ruys

Rosa omeiensis pteracantha

white - landscape shrub rose
250-400 cm
mild, restrained fragrance rose - delicate, sweet, slightly oily scent

Rosa paulii

white - wild rose
70-130 cm
mild, restrained-scented rose - pleasantly spicy
George Paul, Jr.

Rosa pimpinellifolia Frühlingsmorgen

pink-yellow - landscaping shrub rose
150-250 cm
medium-strength, clearly scented rose - muscatel, wild-rose-violet, light floral
Wilhelm J. H. Kordes II.

Rosa pimpinellifolia Marbled Pink

pink - landscape shrub rose
90-150 cm
mild, understated-scented rose - delicate, spicy-herbaceous

Rosa pimpinellifolia Mary Queen of Scots

pink - landscape shrub rose
50-100 cm
medium-strength, noticeably scented rose - scent description not available
Robert Brown

Rosa pimpinellifolia Mon Amie Claire

pink - landscape shrub rose
80-120 cm
rose with a strong, clearly perceptible fragrance - scent description not available
Ivan Louette

Rosa pimpinellifolia Single Cherry

dark-red - landscape shrub rose
100-150 cm
medium-strength, noticeably scented rose - rich, spicy,
classic wild-rose-rosy aroma
-

Rosa pomifera

pink - landscape shrub rose
150-250 cm
mild, restrained-scented rose - apple-fruity, slightly
wild-rose scented
-

Rosa rubrifolia

pink - wild rose
200-300 cm
mild, restrained-scented rose - delicately rosy
character
Pierre André Pourret

Rosa watsoniana

pink - groundcover rose, landscape shrub rose
80-150 cm
very weak, barely perceptible scented rose - no
noticeable fragrance
-

Roxburghii Lampion

pink - park rose
130-200 cm
very weak, barely noticeable scented rose - subtle,
rose character
Lens Roses

Stanwell Perpetual

pale pink - wild rose
80-130 cm
very strong, garden-filling fragrance rose - deep,
damask-scented
C. Brown

Professional supplement for garden roses

In Ireland, the success of garden roses is determined primarily by the mild but very wet oceanic climate, winter wind exposure, local soil structure (in many places heavy, slow-draining soils), and the garden's microclimate. The same variety can behave differently in a sheltered, urban garden in the east of Ireland than on the open Atlantic coastline or in an inland, frost-prone valley. Rose bushes that develop entirely on their own roots provide a stable, well-regenerating foundation over the long term in this changeable environment, especially where container-grown roses intended for home gardeners are concerned.

1) Season length and planting window - an oceanic rhythm

Because of mild winters and cool summers, the roses' active period is extended, but not always warm. The season is not short; rather, it is unpredictable, which must be taken into account in planting and garden-planning decisions.

2) Microclimate and wind exposure - coast versus inland gardens

In open coastal areas, the drying effect of wind presents a challenge; further inland, frost pockets pose a risk. For this reason, a simple windbreak such as a house wall, hedge, or front garden can make a major difference for roses, while still allowing sufficient air movement.

3) Rainfall distribution and standing water - the risk of too much water

Frequent rain and heavier soils that dry slowly place stress on the root zone. Where water sits, the risk of root suffocation and winter damage is higher, so drainage must be considered more carefully when selecting a planting site for roses.

4) Soil types and structure - more acidic, burdened layers

In many Irish gardens, more acidic and occasionally compacted soil layers occur. Over the long term, these affect a rose's vigour, which is why reaching deeper, looser, humus-rich layers becomes a key horticultural priority.

5) Humid climate and foliar disease pressure - persistent moisture

Foliage that often remains wet favours fungal diseases. In Ireland, overly dense planting, stagnant corners with poor airflow, and permanently shaded spots present greater risks than in drier, continental climates.

6) Freeze-thaw alternation - a test of crown stability

A mild winter can occasionally alternate with sudden cold spells and subsequent thawing. This freeze-thaw cycle can heave shallow-rooted plants more easily, leading to damage in the root zone; therefore, a deeper-reaching, stable root mass is a real advantage.

7) Cool summers instead of heat stress - flowering dynamics

Heatwaves are less often a concern than persistently cool, rainy weather. This affects the flowering rhythm, bud opening, and petal longevity, so in variety selection it is worth favouring roses that flower reliably in this climate as well.

8) Regional differences within Ireland - not every garden is the same

There are significant differences between more sheltered urban gardens, inland valleys, and exposed Atlantic coastal areas. The same rose faces different stresses, so a garden's setting, altitude, and level of exposure are always important considerations.

In Irish family gardens, container-grown, own-root roses fit well into the world of front gardens, ornamental beds around the home, and smaller planting areas. A rose group of 1-5 plants creates a tidy, easy-to-manage flowering feature that suits an approachable, family-friendly garden style that is simple to maintain. In cottage-style, looser plantings, roses can be naturally combined with perennials and

ornamental grasses, while the garden still feels cared-for and welcoming, without complicated horticultural solutions.

With basic care adapted to the local Irish climate, a well-chosen planting site, and stable, own-root plants, the rose can remain a predictable, reliable part of your family garden over the long term.
